

Dwelling type: Mid-terrace house  
 Date of assessment: 12 June 2008  
 Date of certificate: 12 June 2008  
 Reference number:  
 Total floor area: 91 m<sup>2</sup>

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO<sub>2</sub>) emissions.

## Energy Efficiency Rating

|  | Current                 | Potential |
|--|-------------------------|-----------|
| <i>Very energy efficient - lower running costs</i> |                         |           |
| (92 plus) <b>A</b>                                 |                         |           |
| (81 - 91) <b>B</b>                                 |                         |           |
| (69 - 80) <b>C</b>                                 | <b>79</b>               | <b>80</b> |
| (55 - 68) <b>D</b>                                 |                         |           |
| (39 - 54) <b>E</b>                                 |                         |           |
| (21 - 38) <b>F</b>                                 |                         |           |
| (1 - 20) <b>G</b>                                  |                         |           |
| <i>Not energy efficient - higher running costs</i> |                         |           |
| England & Wales                                    | EU Directive 2002/91/EC |           |

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

## Environmental Impact (CO<sub>2</sub>) Rating

|   | Current                 | Potential |
|---|-------------------------|-----------|
| <i>Very environmentally friendly - lower CO<sub>2</sub> emissions</i> |                         |           |
| (92 plus) <b>A</b>  |                         |           |
| (81 - 91) <b>B</b>  |                         |           |
| (69 - 80) <b>C</b>  | <b>77</b>               | <b>78</b> |
| (55 - 68) <b>D</b>  |                         |           |
| (39 - 54) <b>E</b>  |                         |           |
| (21 - 38) <b>F</b>  |                         |           |
| (1 - 20) <b>G</b>   |                         |           |
| <i>Not environmentally friendly - higher CO<sub>2</sub> emissions</i> |                         |           |
| England & Wales   | EU Directive 2002/91/EC |           |

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.

## Estimated energy use, carbon dioxide (CO<sub>2</sub>) emissions and fuel costs of this home

|                          | Current                         | Potential                       |
|--------------------------|---------------------------------|---------------------------------|
| Energy use               | 153 kWh/m <sup>2</sup> per year | 147 kWh/m <sup>2</sup> per year |
| Carbon dioxide emissions | 2.3 tonnes per year             | 2.2 tonnes per year             |
| Lighting                 | £66 per year                    | £39 per year                    |
| Heating                  | £244 per year                   | £248 per year                   |
| Hot water                | £86 per year                    | £86 per year                    |

Based on standardised assumptions about occupancy, heating patterns and geographical location, the above table provides an indication of how much it will cost to provide lighting, heating and hot water to this home. The fuel costs only take into account the cost of fuel and not any associated service, maintenance or safety inspection. This certificate has been provided for comparative purposes only and enables one home to be compared with another. Always check the date the certificate was issued, because fuel prices can increase over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

Remember to look for the energy saving recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.
